NuClean Disinfectant Hospital Grade

Contains: Benzalkonium Chloride 8%(w/w), Eucalyptus Oil, Commercial 0.60%(w/w), C12-15 parath - 4 2%(w/w), Dye-Acid Green, Tartrazine Yellow Fluoresceine 0.0003%(w/w)

Kills 99.999% of Germs.

This is Solution. The solution can be used directly without dilution, which may achieve better disinfectant results.

Using a funnel transfer the contents into the container or bottle which has marks to measure and make a diluted solution in the ratio of 1:25. Eg: to make 520ml solution you need 20ml disinfectant and add into 500ml water.

All surfaces should be spot tested in an inconspicuous area before use. Spray directly onto pre-cleaned surface from a distance of 25cm. Leave 5 minutes and then rinse thoroughly. For difficult stains and soap scum, scrub/wipe before rinsing off the solution. The diluted solution needs to be prepared fresh and should be disposed of according to local, state and federal regulations of use.

TARGET	RATIO	MODE OF USE	EFFECT TIME
Stainless or Aluminium	1:25	clean, soak, rinse	5-20 minutes
General (Non-Porous)	1:25	clean, soak, rinse	5-20 minutes
	1:25	spray	10-20 minutes

Pack: 5L(5000ml) of 2 bottles per box.

Green Card T, Bowie Dick

Used to detect the presence of residual air in small pre-vacuum steam sterilisers operating at 135°C for 3.5 minutes. The card changes colour from purple to green when exposed to a steam sterilisation cycle with acceptable vacuum cycles. Instructions for use: The Bowie Dick Test is conducted every day, before the first processed load of the steriliser to test the steriliser's air removal system. Place one piece of the Green Card horizontally towards the front of the steriliser rack or cart, near the door and over the drain, in an empty chamber. Run a test cycle for 3.5 to 4.0 minutes. After the cycle has ended, check to see that the colour on the BD card has changed from purple to green. Test failures may indicate air leaks and inadequate air removals of the steriliser.

\$32.95
each

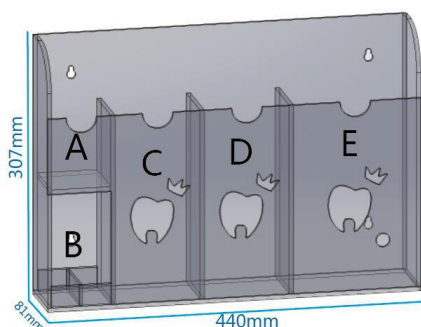

Bowie Dick Test, Tray

A tray for the Green Card T, to be placed into the steam steriliser. Autoclavable up to 135°C.
